**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Group III, claims 47-50 in the reply filed on 01/12/2009 is acknowledged. Claims 1-46 and 51-52 have been canceled. Claims 47-50 are examined on the merits in this action.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 47-50 are rejected under 35 U.S.C. 102(b) as anticipated by a journal article published in *Chemical Communications* (2002) pages 2076-2077 by Houjin Huang et al. (Applicant's admitted prior art).**

Regarding claim 47, Houjin Huang et al. teaches making nitrogen atom encapsulated C<sub>60</sub> (N@C<sub>60</sub>) (page 2076, left, 1<sup>st</sup> paragraph).

Claim 47 is a product-by-process claim and product-by-product claims are not limited to the manipulations of the recited steps, only the structure implied by the steps, according to MPEP § 2113. "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the

Art Unit: 4181

product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). That is, when the reference teaches a product that appears to be the same as, or an obvious variant of, the product set forth in a product-by-process claim although produced by a different process. See *In re Marosi*, 710 F.2d 799, 218 USPQ 289 (Fed. Cir. 1983) and *In re Thorpe*, 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). See also MPEP § 2113.

Regarding claim 48, Houjin Huang et al. teaches that  $N@C_{60}$  contains a nitrogen ion (see page 2076, left, 2<sup>nd</sup> paragraph, reactions (1)-(4), and Fig. 2).

Regarding claim 49, Houjin Huang et al. teaches that  $N@C_{60}$  has no modifying group attached thereto (see page 2076, left, 2<sup>nd</sup> paragraph, reactions (1)-(4), and Fig. 2).

Regarding claim 50, Houjin Huang et al. teaches that  $N@C_{60}$  also forms fullerene polymers such as  $N@C_{60}-N_x(C_{60})_y$  (see page 2076, right, 1<sup>st</sup> paragraph and reaction (5)).  $N_x(C_{60})_y$  is thus a modifying group attached to the gas atom containing fullerene.
